TECHNOLOGIES THAT MATTER

- **Technology** that is built ground-up with MySQL™, Angular JS, Java™, Scala, Vue.js, Java Spring®, Spring Boot, JSON.
- **Best in case NLP (Natural Language Processing)** using Python.
- **Integrate** with our API or iFrame solutions to build a **seamless SSO** for customers.
- **Partnering Industry leaders** like AWS, Google, Microsoft.
- **Strong data protection** measures.
- **Advanced and secured database management** via OrientDB & MySQL™

"As a chain with multiple properties & multiple locations, we have a challenge at the head office to get a single dashboard view of our customer sentiment. KePSLA solves this for us. Our colleagues in the various locations can also immediately reply to reviews spread over different booking and review sites, which saves them a lot of time."
